

Penang & Kulim

Weather / Flood Status

Advisory · 25 August 2026 · 14:00 MYT

LEAD VERDICT

No active flood warnings for Penang or Kulim. Isolated thunderstorms clearing by evening. National haze at unhealthy levels across 30 areas — N95 masks advised for sensitive groups.

01 Flood Status

Penang — No Active Flood Warning

DOA (Disaster Operations Centre) records show no active flood warnings for Penang as of 25 Aug 2026. Coastal low-lying areas remain the primary risk zone if conditions change.

OBS

Source: DOA Portal (dapurtrends.doa.gov.my) — retrieved 25 Aug 2026

Kulim — No Active Flood Warning

No active alerts in Kulim district. Recent weather advisory issued 22 Aug notes general storm risk across Kedah but no flood-specific activation.

OBS

Source: DOA Portal + Kedah Weather Advisory (22 Aug 2026)

Historical Context: Sedim Flash Flood

Flash flood occurred 17 July 2026 in Kulim's Sedim area following heavy rainfall. River systems in the catchment may still carry elevated water levels — residual risk for downstream flooding if new heavy rain arrives.

02 **Current Weather**

Penang: Isolated Thunderstorms, Clearing by Evening

Scattered thunderstorms over coastal Penang this afternoon, expected to clear by evening. Wind speeds within seasonal norms. Sea state moderate — no marine advisories for the Straits of Malacca north of Penang.

OBS

Source: OpenWeatherMap (api.openweathermap.org) — retrieved 25 Aug 2026, 06:00 UTC

National Haze: Unhealthy Levels Across 30 Areas

Haze conditions at unhealthy levels across 30 monitoring stations nationally. Open burning detected via hotspots in Sumatra and Kalimantan. Southwesterly wind patterns pushing smoke plumes toward Peninsular Malaysia. N95 masks advised for sensitive groups.
