III. Active Signals

SIGNAL 1 — Today's Thunderstorms (Penang Coastal)

MetMalaysia forecasts isolated thunderstorms over Penang's coastal areas this afternoon (25 Aug). Morning haze transitioning to storm activity. Night clears. **OBS**

Impact: Flash flooding possible in low-lying coastal areas (George Town, Butterworth, Bayan Lepas). Duration: afternoon only, clearing by evening.

SIGNAL 2 — Haze: 30 Areas Unhealthy

The Star reports haze at unhealthy levels across 30 areas in Malaysia as of today. 17 areas under Level 1 (unhealthy) status. Pahang Sultan has urged public precautions. **OBS**

Impact: Penang under haze since yesterday. Outdoor activity risk elevated. N95 masks recommended for sensitive groups.

SIGNAL 3 — Tropical Storm Narra Advisory

MetMalaysia issued an advisory for Tropical Storm Narra today (25 Aug). Details on track/intensity not yet available in scraped data. **OBS**

Impact: Monitor closely. If Narra tracks westward, Penang/Kedah could see enhanced rainfall later this week. Current forecast shows clearing by Fri 28/08, which suggests the storm may pass without direct impact. **INT**

SIGNAL 4 — Kulim Flash Flood History (17 July 2026)

A sudden flash flood (Kepala Air) occurred at Sedim Rainforest Resort, Kulim on 17 July 2026. Heavy rainfall upstream caused rapid water surge. **OBS**

Impact: River systems in Kulim may still be elevated or debris-choked. Aug 14 warning included Kulim, Bandar Baharu, Baling, Kuala Muda in Kedah thunderstorm alert. **DER**

SIGNAL 5 — Penang Flood Infrastructure

Penang has 170 flood-prone locations, including 44 classified as frequently flooded. The state has 56 flood warning sirens, including 6 in the Sungai Pinang area. **OBS**

Impact: Infrastructure is in place. Sirens provide early warning of rising river levels. Second siren = time to evacuate. **DER**

SIGNAL 6 — Aug 28-30 Clear Window

MetMalaysia forecasts no rain for Penang from Friday 28 Aug through Sunday 30 Aug. This is the clearest window in the 7-day outlook. **OBS**

Impact: Good window for outdoor activities, travel, or any deferred errands. Haze may persist (separate from rain forecast). **INT**

SIGNAL 7 — El Nino Alert Aug-Sep 2026

Scientists preparing for a major weather transition that could bring drought and floods to Malaysia in August-September 2026. **SPEC**

Impact: El Nino typically means drier conditions for Malaysia, but transition periods can produce erratic rainfall. Monitor MetMalaysia weekly updates. **INT**

IV. Flood Risk Assessment

Area	Risk Level	Current Status	Key Factor
George Town	MODERATE	No active warning	Coastal T-storms this afternoon
Butterworth	MODERATE	No active warning	Low-lying, coastal exposure
Bayan Lepas	MODERATE	No active warning	Industrial area, drainage dependent
Sungai Pinang	MODERATE	No active warning	6 sirens active, river monitoring
Kulim Town	LOW	No active warning	Inland, no T-storm forecast today
Sedim (Kulim)	MODERATE	Post-flash flood (17 Jul)	River debris, upstream risk

DER Risk levels derived from MetMalaysia forecast + historical flood data. Not an official assessment.

V. What To Do

IF YOU'RE IN PENANG TODAY

Afternoon (12pm-5pm): Stay indoors if possible. Isolated thunderstorms expected over coastal areas. If you must go out, carry an umbrella and avoid low-lying roads.

Evening/Night: Clear. Safe for outdoor activity.

Haze: Check PSI/AQI before outdoor exercise. N95 for sensitive groups.

IF YOU'RE IN KULIM

Today: No thunderstorm forecast for Kulim specifically. Clear skies expected.

Sedim area: Avoid river activities. Post-flash flood debris may still be present. River levels may be unpredictable.

This week: Monitor Kedah warnings. Aug 14 warning included Kulim in thunderstorm zone.

WATCH TROPICAL STORM NARRA

MetMalaysia issued advisory today. Track not yet clear. If it intensifies or tracks westward, Penang/Kedah rainfall could increase significantly from Wed-Thu. Monitor: **met.gov.my**
