artifact_sha256 delivered in EDITION-002.sha256 – a file cannot embed its own hash
signature      not_signed (hashes only; authorship is not proven by a hash)
```

The content hash above covers the canonical source of this document and was computed before it was injected, so it is checkable from the page. The artifact hash covers the rendered file's bytes and therefore cannot appear inside it — it ships in the sidecar, in sha256sum -c format. Neither hash says anything about whether the contents are true.

Situation

Whether LNG exported from Bintulu falls under PETROS or stays with PETRONAS CONTESTED

No document in the public record defines the boundary for the export molecule specifically. The dispute is live at the Federal Court on the constitutional question underneath it, which means the commercial question cannot settle before the constitutional one does. Unchanged from Edition 001.

Budget 2027 tabled in Parliament, 9 October 2026 OPEN

Tabled 9 October, 21 days from this edition. The petroleum dividend figure and the fuel subsidy line become checkable on that date. This is the point at which the projection item above either acquires a source or does not.

Wall

Federal Court full hearing date on the PDA 1974 challenge OPEN

Leave was granted, so the appeal exists. No date for the full hearing is in the public record. This is UNRESOLVED rather than WITHDRAWN: the date is knowable, the court simply has not set it publicly. It will appear, and this item is what notices when it does.

The RM10-20 billion petroleum revenue projection CONTESTED

The range circulates without a filing behind it. Two published readings disagree and neither is traceable to a document. Labelled CONTESTED rather than estimated, because an estimate carries a method and this does not.

Source: no primary document located — range appears in secondary commentary only

Void

RM13.3 billion of unclaimed money with the Accountant-General OPEN

Not a news item, which is exactly why it stays unknown: it is a register nobody markets. Verifiable by the individual in about a minute using an identity card. Structurally the same shape as any unclaimed entitlement — it belongs to someone who does not know it exists.

Nomination voiding silently on a change of marital status OPEN

A nomination made before a marriage is not automatically the nomination that applies after it. The failure is silent and is discovered by survivors. The fund itself

has publicly corrected circulating messages on this, which is the reason to take it from the fund rather than from a forwarded message.

Eureka

AI-generated intimate images fall inside the criminal definition NEW

The 2026 cybercrime amendments bring synthetically generated intimate images within the offence rather than leaving them outside it. Worth knowing before it is needed, because the person who needs it is usually already under attack when they find out.

The market index is still below its own 2014 peak SETTLED

Twelve years under a high set in July 2014, while nominal output roughly doubled over the same period. A settled observation rather than a live signal: it is context for reading any claim about a market at a record.

Risk

Electricity protection threshold reverts 800 to 600 kWh on 1 January 2027 OPEN

105 days from this edition. The extended band was a temporary widening; the underlying automatic fuel adjustment mechanism continues underneath it and its December reading is projected at the highest of the year. The reversion and the adjustment land in the same window, which is where a household bill can move twice.
