artifact_sha256 delivered in EDITION-008.sha256 — a file cannot embed its own hash
signature      not_signed (hashes only; authorship is not proven by a hash)
```

The content hash above covers the canonical source of this document and was computed before it was injected, so it is checkable from the page. The artifact hash covers the rendered file's bytes and therefore cannot appear inside it — it ships in the sidecar, in sha256sum -c format. Neither hash says anything about whether the contents are true.

0 · What Changed Since Yesterday

Compared against **EDITION-007**. 5 new, 6 moved, 1 settled, 23 carrying over, 3 dropped without resolution

Changed state (6)

Item	Section	Was	Now
UNGA week: no US-Iran meeting confirmed; Trump now points to a deal after the midterms	SITUATION	NEW	MOVED
Supertanker queue at Saudi Gulf terminals carries forward; the Yanbu restart is the drain for it	SITUATION	MOVED	OPEN
Pump band publishes tonight - last verified band RON95 market RM4.37, RON97 RM4.87, diesel RM5.27; BUDI95 RM1.99	RISK	OPEN	MOVED
The physical unwind starts before the cost unwind - watch the freight leg	VOID	OPEN	MOVED
OD1 March 2027 - about five and a half months out; the ground firmed slightly this week	OWN	OPEN	MOVED
OPS: three organs report degraded; FED, FRAME and A-FORGE green; no calendar source; no weather warning	SITUATION	OPEN	MOVED

New today (5)

Item	Section	Was	Now
Hormuz stays shut on day 206; Iran offers a seven-day reopening - conditional, and contradicted by its own demands	SITUATION	—	CONTESTED

Situation

Brent rebounded to about USD 101.8 on Tuesday - the four-session slide stopped at one print MOVED

Brent rose about 1.5 percent on Tuesday 22 September to roughly USD 101.8, with WTI about USD 97.2, ending four consecutive down sessions. Two things drove it: Trump said he believed a deal with Iran was reachable after the US midterms, and the Saudi pipeline restart report landed the same day. Monday's close below USD 100 was therefore a single print, not a trend. For the OD1 arithmetic the price anchor is back on the hundred line - but it is being held there by a diplomatic calendar, not by physical scarcity.

Source: Reuters 22 Sep 2026 'Oil rises slightly ahead of potential US-Iran talks'; IndexBox market recap 22 Sep (Brent 101.82, WTI 97.22, +1.5 pct); NBC News 22 Sep (earlier drops erased after Trump's post-midterms remark). W=3. Anti-thesis search 'Iran rejects Hormuz reopening conditions September 2026 oil supply risk' returned a live counter-signal - Iran's six demands and a climbing-price analysis - so the headline is stated as conditional, not as a trend.

UNGA week: no US-Iran meeting confirmed; Trump now points to a deal after the midterms MOVED

Trump said on 22 September that he believes he can reach a deal with Iran to end the war, but placed it after the US midterms; no meeting with President Pezeshkian has been confirmed during the UNGA session in New York. Oil see-sawed inside the session on that single statement before closing higher. Logged strictly as the dominant price driver, per the standing instruction that political narrative stays out of this brief.

Source: NBC News 22 Sep 2026; Reuters 22 Sep 2026; AGBI and Mezha same-day. Chronological lock: statement 22 Sep < US midterms November 2026. W=3, all three quoting the same remarks - counted as two origin units (wire plus broadcaster).

RESOLVED: East-West pipeline restarted after nine days - first Yanbu cargo loading SETTLED

Aramco restarted the East-West pipeline on Tuesday 22 September after nine days offline and resumed crude supply to its Red Sea refineries, with one cargo scheduled to load at Yanbu that same day. The company is working back toward four million barrels a day; a security source says full resumption may still take weeks. This closes the outage item opened on 17 September - closed by an observed restart, not by an announced target.

Source: Reuters via US News 22 Sep 2026; Rigzone 22 Sep 2026 ('Saudis in Process of Starting Vital Oil Pipeline'); Daily Caller/Reuters 22 Sep (4 million bpd target, weeks to full). Chronological lock: attack 12 Sep < repair start 17 Sep < restart reported 22 Sep. W=2 (one wire plus independent trade press).

Hormuz stays shut on day 206; Iran offers a seven-day reopening - conditional, and contradicted by its own demands CONTESTED

The strait remains effectively closed to commercial shipping: 8 transits on 13 September against roughly 85 a day in normal times. A senior Iranian official told

Reuters on 22 September that Iran could reopen within seven days if Washington eases military pressure and lifts the blockade of Iranian ports. That sits beside Iran's 21 September position that reopening is ruled out until six sweeping demands are met including sanctions relief and reparations. Both statements are Iranian, Muscat still has not confirmed the plan, and Washington has not responded. Treat the seven-day line as a negotiating position, not a schedule.

Source: GlobalSecurity Iran War Day 207 report 22 Sep citing Reuters; OilPrice 'Iran says Hormuz stays closed until US meets six sweeping demands'; Rediff 21 Sep ('Iran rules out reopening'); straits.live tracker (day 205-206 status, 8 vs 85 transits). Reopening timeline CONTESTED - two Iranian positions recorded, no US or Omani confirmation. W=2 for the statements, W=1 for the tracker.

Supertanker queue at Saudi Gulf terminals carries forward; the Yanbu restart is the drain for it OPEN

The combined 14 million barrels of tanker capacity waiting at Saudi Gulf export terminals - the highest count since at least June - carries forward from the 21 September reading, with no newer transit count published in this sweep. The pipeline restart reported on 22 September restores the Red Sea bypass route, and that bypass is the mechanism that draws the queue down first. Carries forward.

Source: TradingEconomics 21 Sep 2026, tanker-tracking and satellite data - W=1 origin, flagged as such. Restart sourcing as recorded in the Yanbu item above.

Houthi maritime posture holds; no new strike decision reported OPEN

The Houthi position at Mocha and the depressed Bab el-Mandeb traffic pattern carry forward with no new development in this sweep. HRW's 15 September documentation of four confirmed attacks on commercial vessels remains the last verified count. Position unchanged.

Source: Register carry-forward; HRW 15 Sep 2026 report (Encelia, Daisy, Tihamah, Amzan). Sweep 23 Sep found nothing newer.

TechnipFMC wins iEPCI contract for Carigali's Limbayong deepwater project NEW

TechnipFMC announced on 22 September that its subsidiary FMC Wellhead Equipment was awarded a significant integrated engineering, procurement, construction and installation contract by PETRONAS Carigali for the Limbayong deepwater development offshore Malaysia. This is greenfield subsea work, let in the same operating year the rightsizing programme concluded. What it tells you: the project portfolio the new structure inherits includes multi-year deepwater commitments that run well past March 2027 - the kind of fact the OD1 decision has to price.

Source: TechnipFMC corporate announcement 22 Sep 2026, relayed by Cyprus Shipping News same day. W=1 origin unit (one corporate release), flagged as such. No contract value was disclosed and none is stated here.

Paper and physical start to meet: pipeline back on, Brent back at the hundred line MOVED

The crack logged on 21 September - physical barrels moving while the price anchor softened - narrowed from the physical side this week. The Yanbu restart restores 4 million barrels a day of designed bypass capacity and Brent closed back above the hundred line. What matters for OD1 is unchanged in kind, smaller in size: the revenue assumption inside Budget 2027 lands 16 days from now against a price held up by diplomacy rather than by supply.

Source: Compiled from the Brent item (W=3) and the Yanbu item (W=2) above. Chronological lock: outage 12 Sep < restart 22 Sep < budget tabling 9 Oct. Sequence holds.

Budget 2027 is tabled Friday 9 October - 16 days from today [OPEN](#)

The Ministry of Finance confirms Budget 2027 goes to Parliament on 9 October 2026, after Budget 2026's RM419.2 billion. This is the next formal public occasion where petroleum revenue assumptions, subsidy policy and anything touching the sector will be stated on the record. With Brent back at the hundred line, watch whether the revenue anchor moves off the figure used in the pre-budget statement. Countdown: 16 days.

Source: MOF Pre-Budget Statement 2027 (mof.gov.my press release); parliamentary sitting calendar. W=2.

Carbon tax delay carries forward; Budget 2027 is the next date that matters [OPEN](#)

No new statement on the carbon tax since the delay. The 9 October budget remains the next plausible occasion for a revised timeline. Carries forward.

Source: Register carry-forward; MOF pre-budget statement checked - no carbon tax revision published.

Sarawak petition on PDA 1974 and the petroleum statutes carries forward [OPEN](#)

The Federal Court petition on the Petroleum Development Act 1974, Continental Shelf Act 1966, Petroleum Mining Act 1966 and the 1954 boundary order stands as scoped. No published outcome from the SABAR intervention application, which was fixed for hearing on 28 August. Whatever the final shape of this litigation, it is the structural question over Carigali's Sarawak operating future. Carries forward.

Source: Reuters 23 Feb 2026; The Edge 10 Jun 2026 on the SABAR intervention. Absence of post-hearing reporting noted, not resolved.

Block A-18-01 PSC carries forward - Carigali subsidiary PC JDA, 35-year term [OPEN](#)

The new production sharing contract for Block A-18-01 in the Malaysia-Thailand Joint Development Area, awarded to PC JDA Ltd with PTTEP JDX, carries forward with no development since the 14-15 September signing coverage. A companion gas sale agreement with PETRONAS and PTT supports supply continuity to both countries. Carigali upstream, 35 years.

Source: PETRONAS media release 14 Sep 2026; The Star 15 Sep 2026. W=2. PETRONAS media release page checked 23 Sep - nothing newer than 14 September.

PETRONAS LNG portfolio positioning carries forward [OPEN](#)

The stated portfolio strategy - Bintulu, Canada, and the coming Sabah plant built for Asian demand growth - carries forward with no contradicting development. No new release found in today's sweep.

Source: PETRONAS media releases page checked 23 Sep 2026; prior-edition register entry.

Estuary and Mutiara PSC awards carry forward, no new development [OPEN](#)

No new information on the Estuary and Mutiara PSC awards in today's sweep. Carries forward.

Source: Register carry-forward; PETRONAS media release page checked 23 Sep - nothing new.

SEA METEC methane measurement centre carries forward [OPEN](#)

No new development on the Southeast Asia methane measurement centre. Carries forward.

Source: Register carry-forward; sweep 23 Sep found nothing new.

PETRONAS-METLEN LNG sale and purchase agreement carries forward [OPEN](#)

No new development on the METLEN LNG sale and purchase agreement. Carries forward.

Source: Register carry-forward.

PETRONAS 1H 2026 results carry forward as the last published baseline [OPEN](#)

The 1H 2026 financials remain the last published performance baseline. Q3 will land against a very different Brent path than H1 saw. Carries forward.

Source: Register carry-forward.

Fed policy setting carries forward; no new development in the window [OPEN](#)

The rate environment carries forward unchanged: it feeds LNG contracting economics and the ringgit, which in turn feeds domestic fuel and tariff decisions. No new Fed development in this window.

Source: Register carry-forward; no FOMC communication found dated 22-23 Sep 2026.

OPS: three organs report degraded; FED, FRAME and A-FORGE green; no calendar source; no weather warning [MOVED](#)

Health at 06:05 MYT: arifOS (8088) yellow - deployment attestation drift, source commit and built commit disagree, recorded as SOT drift rather than code drift, with the vault healthy; FED (7074) green; FRAME (18085) green; A-FORGE sense (7071) green; WELL (18083) degraded; GEOX (8081) degraded with kernel verdict HOLD. That is a step back from yesterday's six-of-seven green and is reported as observed. Calendar: no calendar store exists on this host, so today's items cannot be listed - a missing source, not an empty day. Weather Kuala Muda: rain showers, 24-29C, no warning-level alert. Open loops for you: the F13 batch ratification on D1 to D4 plus the separation-of-powers rule is still awaiting your word, and the ghost postgres on port 5432 retires only under that lock. Standing rule applied: political narrative stripped, focus kept on OD1.

Source: Live curl probes 06:05 MYT 23 Sep 2026 (8088, 7074, 18085, 18083, 8081, 7071); open-meteo Kuala Muda forecast same run; carry_forward entries e-8f999a05, e-10286dd4, e-d56ce74f, e-fadd57bf, e-6207c00b; brief-rules.md standing instruction.

Wall

WALL: the Federal Court full hearing date on the PDA 1974 petition remains unpublished

[OPEN](#)

UNRESOLVED, not withdrawn: a full hearing date is knowable and will be published, but no open source carried one in this sweep. The March 16 date in circulation belongs to the separate PETRONAS leave application, not the state petition's full hearing. Do not conflate the two. This wall stands.

WALL: whether LNG exported from Bintulu sits with PETROS or PETRONAS remains contested CONTESTED

No filing, judgment or authoritative statement resolves the Bintulu LNG jurisdiction question in open sources. It stays **CONTESTED** - not **SETTLED**, not **WITHDRAWN**. This wall stands until a court or a filing speaks.

Source: Register carry-forward; sweep 23 Sep 2026 found no resolving document.

Void

The physical unwind starts before the cost unwind - watch the freight leg MOVED

With the pipeline restarted and talks dangled, the security premium now has a path to fall faster than the costs built on top of it. War-risk premiums on Gulf transits and LNG freight reprice on exposure windows, so they unwind over weeks to quarters after the trigger event, not in the same session. Concrete consequence for you: if the reopening talk continues, expect Brent to fall before PETRONAS's delivered-cost base does - a margin squeeze that shows up in the trading and LNG books after the crisis has left the front page.

Source: Mechanism documented in prior editions' insurance-market sourcing; today's triggers are the Yanbu restart (W=2, dated 22 Sep) and the conditional seven-day offer (dated 22 Sep).

EPF nomination voids on change of marital status - check it once, before OD1, not after

OPEN

A change in marital status voids an existing EPF nomination, and the money then distributes by faraid and probate rules rather than your written choice. Concrete consequence: in an exit year with a lump-sum package touching EPF-adjacent planning, an outdated nomination is a silent failure that only surfaces at the worst moment. One portal check, five minutes. Carries forward.

Source: Register carry-forward; EPF nomination rules as documented in prior edition sourcing.

RM 13.3 billion of unclaimed money sits at the Accountant-General's office OPEN

Dormant accounts, unpaid dividends, stale cheques - searchable by IC at egumerih.hasil.gov.my. Concrete consequence: thirteen years at one employer through reorganisations means old payroll accounts and insurance payouts are plausible candidates, and a separation year is the natural moment to sweep the register once. Carries forward.

Source: Register carry-forward; figure as published in prior edition sourcing.

Sarawak state election due by April 2027 OPEN

The election clock runs alongside the PDA petition and OD1. Concrete consequence: state-federal petroleum politics will be campaign material in Sarawak, which raises the odds of movement - or noise - around the Petros file inside your OD1 window. Carries forward.

Source: Register carry-forward; constitutional due date.

Tasik Bera encroachment carries forward OPEN

No new development on the Ramsar-site encroachment issue. Carries forward as a standing environmental-governance watch item.

Source: Register carry-forward.

Eureka

An amoeba that multiplies at 145F pushes the ceiling for complex life NEW

Scientists have named a 'fire amoeba' - a eukaryote, the same domain of life as everything you can see - that reproduces at 145F and keeps moving up to 147F, the highest recorded for complex life. Bacteria manage hotter; cells with nuclei were thought to top out lower. It matters because the temperature ceiling for complex cells is one of the filters in every 'could life exist there' argument, including subsurface and geothermal settings.

Source: NPR 22 Sep 2026 science report naming the species and the two temperature records. W=1 origin, flagged. Checkable against the underlying study.

An amateur found a major impact crater while looking for a campsite NEW

An amateur astronomer scanning satellite maps for a Quebec camping spot spotted a massive ancient impact crater. Impact structures are usually found by specialists running geophysics; this one came from pattern recognition on public imagery. If the identification holds it joins a short list - Earth counts fewer than 200 confirmed impact craters.

Source: ScienceDaily 22 Sep 2026. W=1 origin, flagged. Verification path stated plainly: identification currently rests on imagery and needs field and petrographic confirmation.

A proto-supercluster of infant galaxies found very early in cosmic time NEW

Astronomers report a very early and rare proto-supercluster of infant galaxies, a structure that should help explain how galaxy clusters formed and how they plug into the cosmic web. Clusters are the largest gravitationally bound objects in the universe; catching one still assembling, this early, is the equivalent of finding the scaffolding before the building.

Source: Universe Today, 22 Sep 2026 (Cosmology), reporting the discovery. W=1 origin, flagged; checkable against the underlying survey paper.

Risk

Haze improving again: 16 areas unhealthy at 8am, 17 stations with 10 in Sarawak MOVED

Readings on 22 September showed 16 areas unhealthy at 8am and 17 stations nationwide, 10 of them in Sarawak, with the worst at Sibu 178, Sri Aman 169, Mukah 168 and Serian 160. That continues the decline from the 20 September peak of 32 areas. For Kuala Muda specifically: peninsula readings sit outside the unhealthy band and no warning-level alert is active. No emergency-threshold movement anywhere in the country.

Source: The Star 22 Sep 2026 (16 areas, 8am); TheRakyatPost 22 Sep (17 stations, 10 in Sarawak, Kapit 173); The Edge Malaysia 22 Sep 9am readings (Sibu 178, Sri Aman 169). W=2-3, same-day timestamps ordered.

Pump band publishes tonight - last verified band RON95 market RM4.37, RON97 RM4.87, diesel RM5.27; BUDI95 RM1.99 MOVED

The data.gov.my series still carries the 17 September band as the latest verified level: RON95 market RM4.37, RON97 RM4.87, diesel RM5.27, subsidised BUDI95 RM1.99. Tonight, Wednesday 23 September, the next band publishes for effect on the 24th - this is the update day the last edition flagged. With Brent back near USD 102 the market legs have no strong reason to soften this week; the subsidised RON95 you actually pump does not move with them either way. Watch item, not a decision.

Source: storage.data.gov.my/commodities/fuelprice.csv - level rows read directly this run; latest level row 2026-09-17 (RON95 4.37, RON97 4.87, diesel 5.27, BUDI95 1.99). Figure ledger: all four prices trace to the MoF-published CSV, no news quote used. Schedule from the same catalogue page.

Electricity protection threshold reverts from 800 to 600 kWh on 1 January 2027 OPEN

The raised 800 kWh shield - no AFA, retail charge or SST - runs September to December 2026 and reverts to 600 kWh on 1 January 2027. That is one month before OD1. If household usage sits between 600 and 800 kWh, the January bill jumps. Carries forward.

Source: paultan.org 17 Sep 2026; Life News Agency same week citing the announcement. W=2.

Coal at USD 148 per tonne; the minister has tied it to the electricity bill OPEN

Generation-cost pressure carries forward unchanged. Relevant because it feeds the AFA mechanism the 800 kWh shield currently suspends - when the shield reverts in January, this is what the bill re-exposes to. Carries forward.

Source: Register carry-forward; no new ministerial statement in this sweep.

AI-generated intimate images fall inside the criminal definition - carries forward OPEN

The legal protection position carries forward with no new development. Stays on the register as a standing awareness item.

Source: Register carry-forward.

Own

OD1 March 2027 - about five and a half months out; the ground firmed slightly this week

MOVED

Nothing here requires an action today. What moved: the Yanbu restart restored the bypass route and Brent closed back at the hundred line, so the revenue ground the MSS package was quoted against is steadier this week than last. Two dates sit inside your decision runway: Budget 2027 in 16 days, and the electricity threshold reversion on 1 January - one month before exit. The organisation you are operating in is already the post-rightsizing one, and the portfolio still carries multi-year deepwater commitments such as the Limbayong award above; both are facts the March decision has to price.

Source: Register carry-forward (OD1 March 2027, MSS quoted). Ground movement sourced to the SITUATION and RISK items above.
